Production of cone packages

Production of packages of various configurations (with Euro Hang Tab, valve, adhesive tape)

Micro and macro perforation of the film (creation of breathable packaging)

Layout Design
Designer services

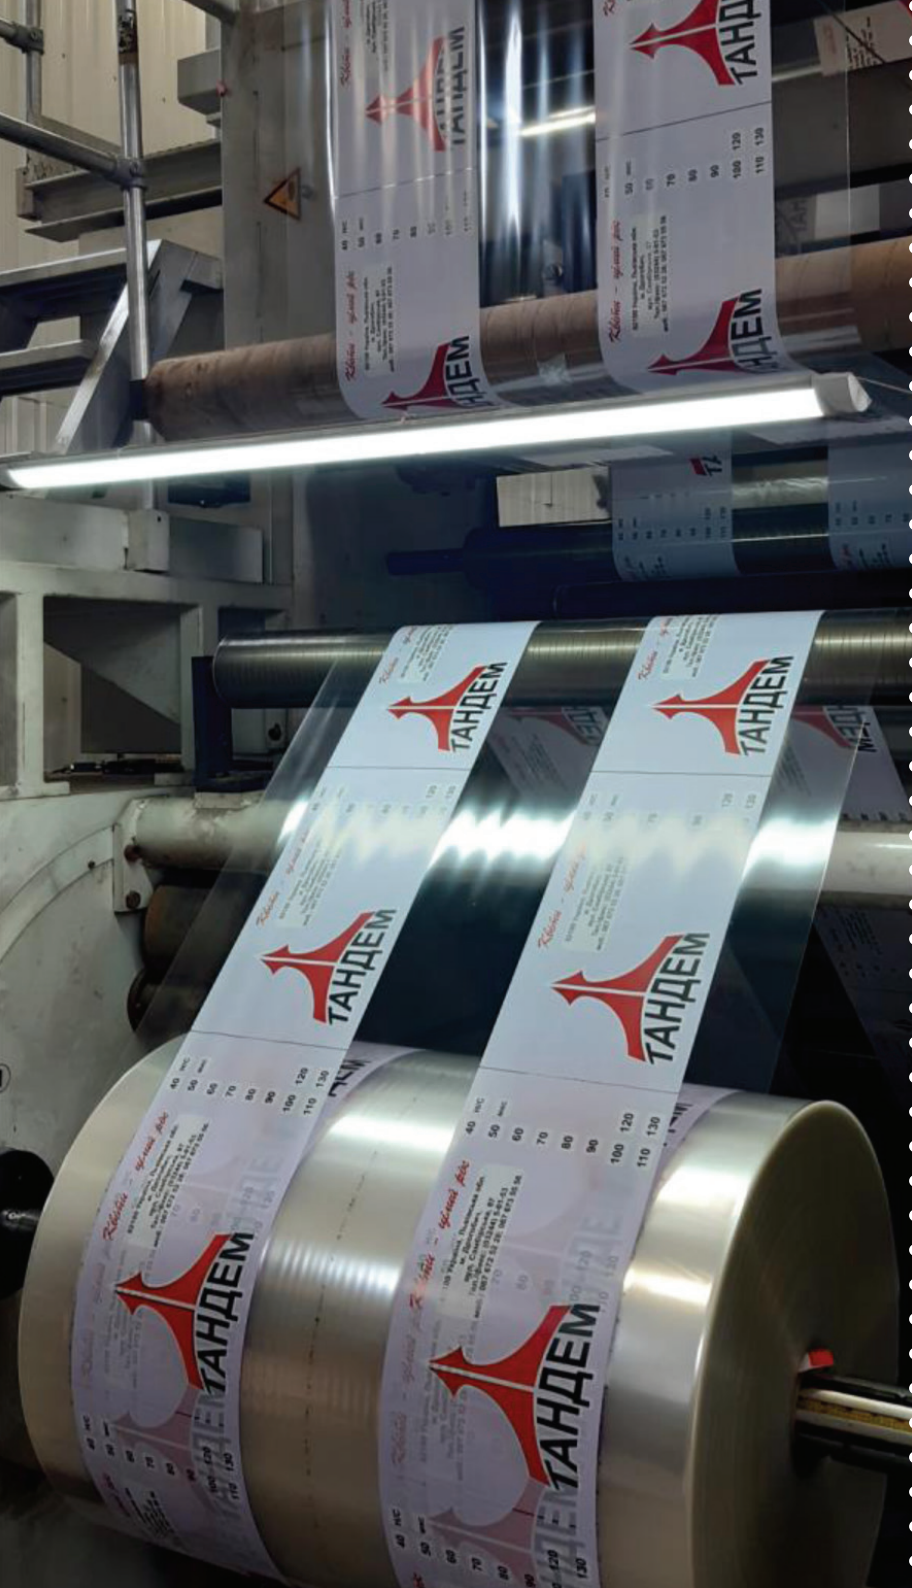

THE COMPANY "ARTHA-S" – we produce branded packaging from polymer film for companies, which prepack and grow fresh herbs, our packaging preserves the product in its original form, conveys the value of the product and presents the product favorably on the market.

Our advantages:

-  Wide and modern equipment fleet, our own engineering developments.
-  We produce certified, safe and environmentally friendly product for which we are fully responsible.
-  Our main raw materials for production are supplied directly from the leading manufacturers in Europe; our stock with raw materials covers monthly need of our customers.
-  Strict control system is implemented at every stage of the production process at the enterprise.
-  We are a team of experts with extensive experience in implementing projects for Ukrainian and European manufacturers.

WE HELP YOU BRING ALL OF YOUR INCREDIBLE IDEAS TO LIFE

100 words about the company «Artha-s»

ARTHA (from Sanskrit artha – «object», «purpose», «meaning», «benefit»), in Indian philosophy is one of four goals of human existence, the achievement of material well-being, profit, as well as erudition and success in life.

The main office of the company, the production workshop and the wholesale and retail warehouse of the company are located in Dnipro city, Ukraine.

BASIC SERVICES:

- Flexographic printing (a method of printing with quick-drying inks, on flexible materials);
- Micro perforation (creation of a “breathable” packaging, hole diameter 1 mm);
- Macro perforation (creation of a “breathable” packaging, hole diameter 3-4-8 mm);
- Folding in half-sleeve film (bending the sheet);
- Production of packages of different configurations (with the euro hang tab, valve, adhesive tape, additional seam);
- Production of conical packages;
- Development of an individual layout for branding, Designer services.

OUR MAIN BUSINESS AREAS:

- Packaging for flowers, herbs and gifts;
- Packaging for food and industrial products.

Why are we trustworthy

We put our soul in our business and have earned a serious reputation from our Partners

We are the №1 in the production of breathable packaging for flowers in Ukraine

90% of our customers have chosen the company "ARTHA-S" as their main supplier

20 years on the Ukrainian market

90% of the packaging material of the freshly cut flowers market in Ukraine is produced at our enterprise

Over 4,000 kg packaging products are produced daily

The reserve capacity of the enterprise is about 30%

Our priority task is to increase the efficiency of our partners' business processes

TECHNICAL SPECIFICATIONS:

Film Material	BOPP
Film Density.....	from 15 to 40 mkm
Film Width.....	from 150 to 1000mm
Spool Diameter.....	from 200 to 400mm
Density.....	0,91 g/cm*3
Kinetic Friction Coefficient	0,2
Thermal shrinkage 120 C, in 5 minutes no more	2-4%
Turbidity no more.....	3%
Welding strength at 130 C, 1 bar, 1 sec	2,5 - 3,0 N/15 mm
Welding range at 1 bar, 1 sec	105 - 140 C
Gloss at 450 %, no less.....	85%

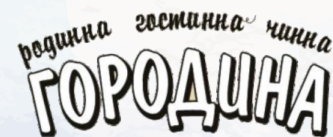

Film in a spool transparent

This product is suitable for producers of freshly cut flowers (greenhouses, wholesale companies, retail chains) and flower retail stores

ADVANTAGES OF POLYPROPYLENE FILM (BOPP):

-  Transparency of packaging – allows you to attract attention and demonstrate the quality of products.
-  Convenient packaging – the film is simply soldered, its usage is optimal for automatic packaging lines.
-  Wear resistance – the material has high strength and resistance to temperature changes.
-  Universality - the material can be used for prepackaging different types of products.
-  **The minimum batch of delivery is from 50 kg.**

Film in a spool transparent «Anti-fog» effect

This product is suitable for producers of freshly cut flowers (greenhouses, wholesale companies, retail chains) and flower retail stores

ADVANTAGES OF POLYPROPYLENE FILM (BOPP) WITH ANTI-FOG COATING:

- A layer of special additives migrating on the surface of the film increases its wettability. Due to this, water droplets are distributed in a thin, invisible layer and the film retains maximum transparency .
- Transparency of packaging – allows you to attract attention and demonstrate the quality of products.
- Convenience of packaging – the film is simply soldered, its usage is optimal for automatic packaging lines.
- It is possible to print on the film.
- Wear resistance – the material has high strength and resistance to temperature changes.

Film in a spool with micro perforation

This product is suitable for producers of freshly cut flowers (greenhouses, wholesalers).

ADVANTAGES OF THE FILM WITH MICRO PERFORATION:

- Transparency of packaging – allows you to attract attention and demonstrate the quality of products.
- Convenience of packaging – the film is simply soldered, its usage is optimal for automatic packaging lines.
- Air exchange – due to the presence of holes, products and goods preserve their qualities, while being in reliable packaging.
- Fast removal of excess moisture – products keep the freshness longer, and moisture does not accumulate in packaging.
- Wear resistance – the material has high strength and resistance to temperature changes.
- **The minimum batch of delivery is from 50 kg**

OUR PARTNERS WHO ALREADY USE THE PRODUCTS:

Film in a spool with macro perforation

This product is suitable for manufacturers of fresh herbs (greenhouses, wholesalers companies, packers).

TECHNICAL SPECIFICATIONS:

Film Material	BOPP
Film Density.....	from 30 to 40 mkm
Film Width.....	from 1 00 to 500 mm
Spool Diameter	from 200 to 400 mm
Density.....	0,91 g/cm*3
Kinetic Friction Coefficient.	0,2
Thermal shrinkage 120 C, in 5 minutes no more	2-4%
Turbidity no more.....	3%
Welding strength at 130 C, 1 bar, 1 sec	2,5 - 3,0 H/15 mm
Welding range at 1 bar, 1 sec	105 -140 C
Gloss at 450 %, no less	85%
Hole diameter	5-8 mm

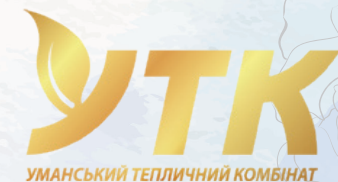

ADVANTAGES OF THE FILM WITH MACRO PERFORATION:

- Transparency of packaging – allows you to attract attention and demonstrate the quality of products.
- Convenience of packaging – the film is simply soldered, its usage is optimal for automatic packaging lines.
- Air exchange – due to the presence of holes, products and goods preserve their qualities, while being in reliable packaging.
- Fast removal of excess moisture – products keep the freshness longer, and moisture does not accumulate in packaging.
- Wear resistance – the material has high strength and resistance to temperature changes.
- **The minimum batch of delivery is from 50 kg**

What does high quality mean?

The company "ARTHA-S" is a supporter of openness and speaks directly about its approach to production:

We work with suppliers of raw materials and plants, which 100% adhere to the standards we have introduced, and each time they confirm the quality of their materials with the necessary documents.

We have a constant control of the sanitary conditions of our production. We have a special control of employees who work with finished products.

All production parameters are documented and we control their actual compliance.

The owner of the company systematically carries out the internal control of all stages of production

We are open to cooperation!

The company «ARTHA-S» is open to cooperation with manufacturers, distributors, and chains of flower shops.

WE KNOW HOW TO WORK WITH PARTNERS IN VARIOUS AREAS AND ALWAYS CREATE A COMFORTABLE WORKING ATMOSPHERE TOGETHER:

Start of cooperation with a test batch

Discussion about a convenient form of payment and shipment

Coordination of supply and delivery schemes

Flexible approach to pricing depending on the purchase volumes of packaging material.

Additionally, for the convenience of European partners, the company has a warehouse in Poland, Warsaw.

WE WILL BE GLAD TO HEAR ABOUT YOUR TASKS AND UNDERSTAND HOW WE CAN BE USEFUL TO YOU!
